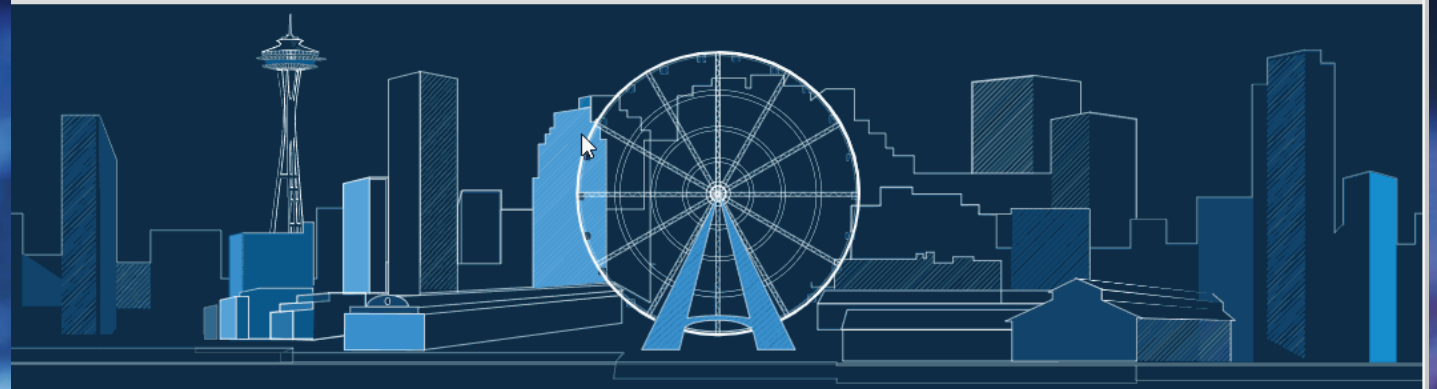
TypeScript 3.7 is now available. Get the latest version today!



TypeScript

JavaScript that scales.

TypeScript is a typed superset of JavaScript that compiles to plain JavaScript.

Any browser. Any host. Any OS. Open source.

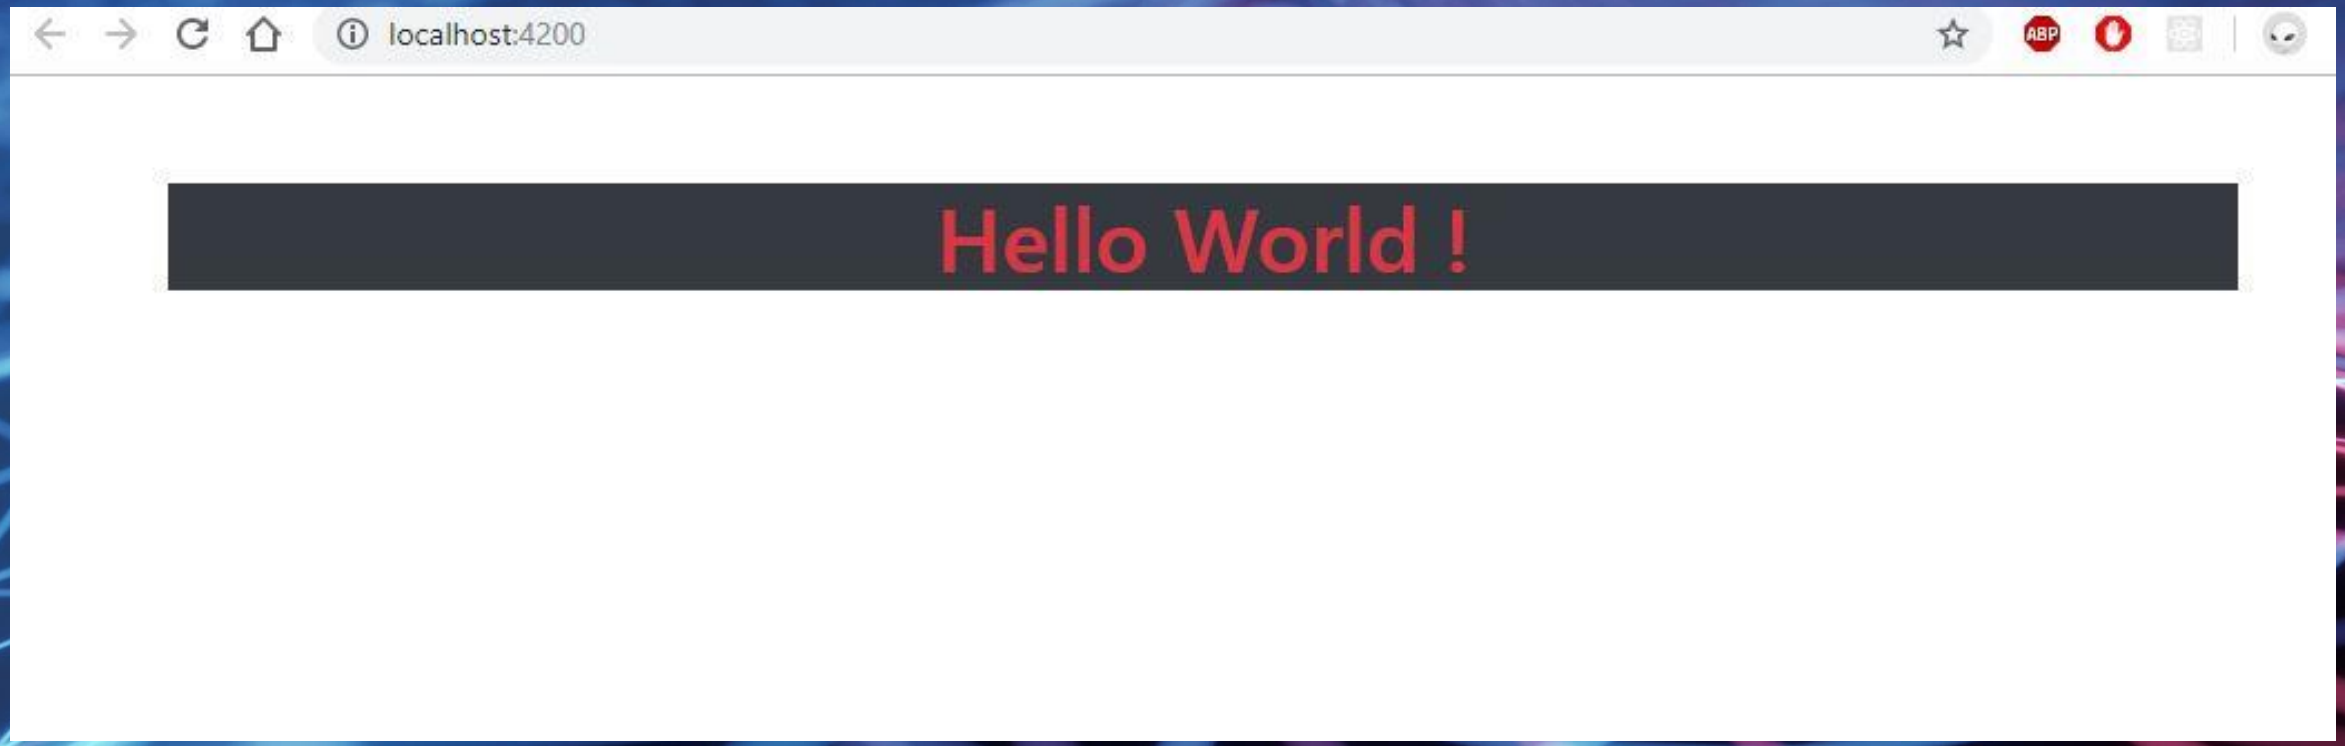
Hello World + Bootstrap



String Interpolation – dans le template

src > app > app.component.html > div.container

You, a few seconds ago | 1 author (You)

```
1  <div class="container">
2    <h1 class="my-5 bg-dark text-center text-danger">
3      {{ title }}
4    </h1>
5  </div>      You, a few seconds ago • Uncommitted changes
```

String Interpolation – dans la class

src > app > TS app.component.ts > ...

You, a few seconds ago | 1 author (You)

```ts
import { Component } from '@angular/core';

```

You, a few seconds ago | 1 author (You)

```ts
@Component({
  selector: 'app-root',
  templateUrl: './app.component.html',
  styleUrls: ['./app.component.css']
})
export class AppComponent {
  title = 'Hello World 2.0 !';
}

```

Un component

Un composant

=

Une Classe + Une Vue (Template)

app.module.ts

src > app > TS app.module.ts > ...

You, a minute ago | 1 author (You)

```ts
import { BrowserModule } from '@angular/platform-browser';
import { NgModule } from '@angular/core';

import { AppRoutingModule } from './app-routing.module';
import { AppComponent } from './app.component';

```

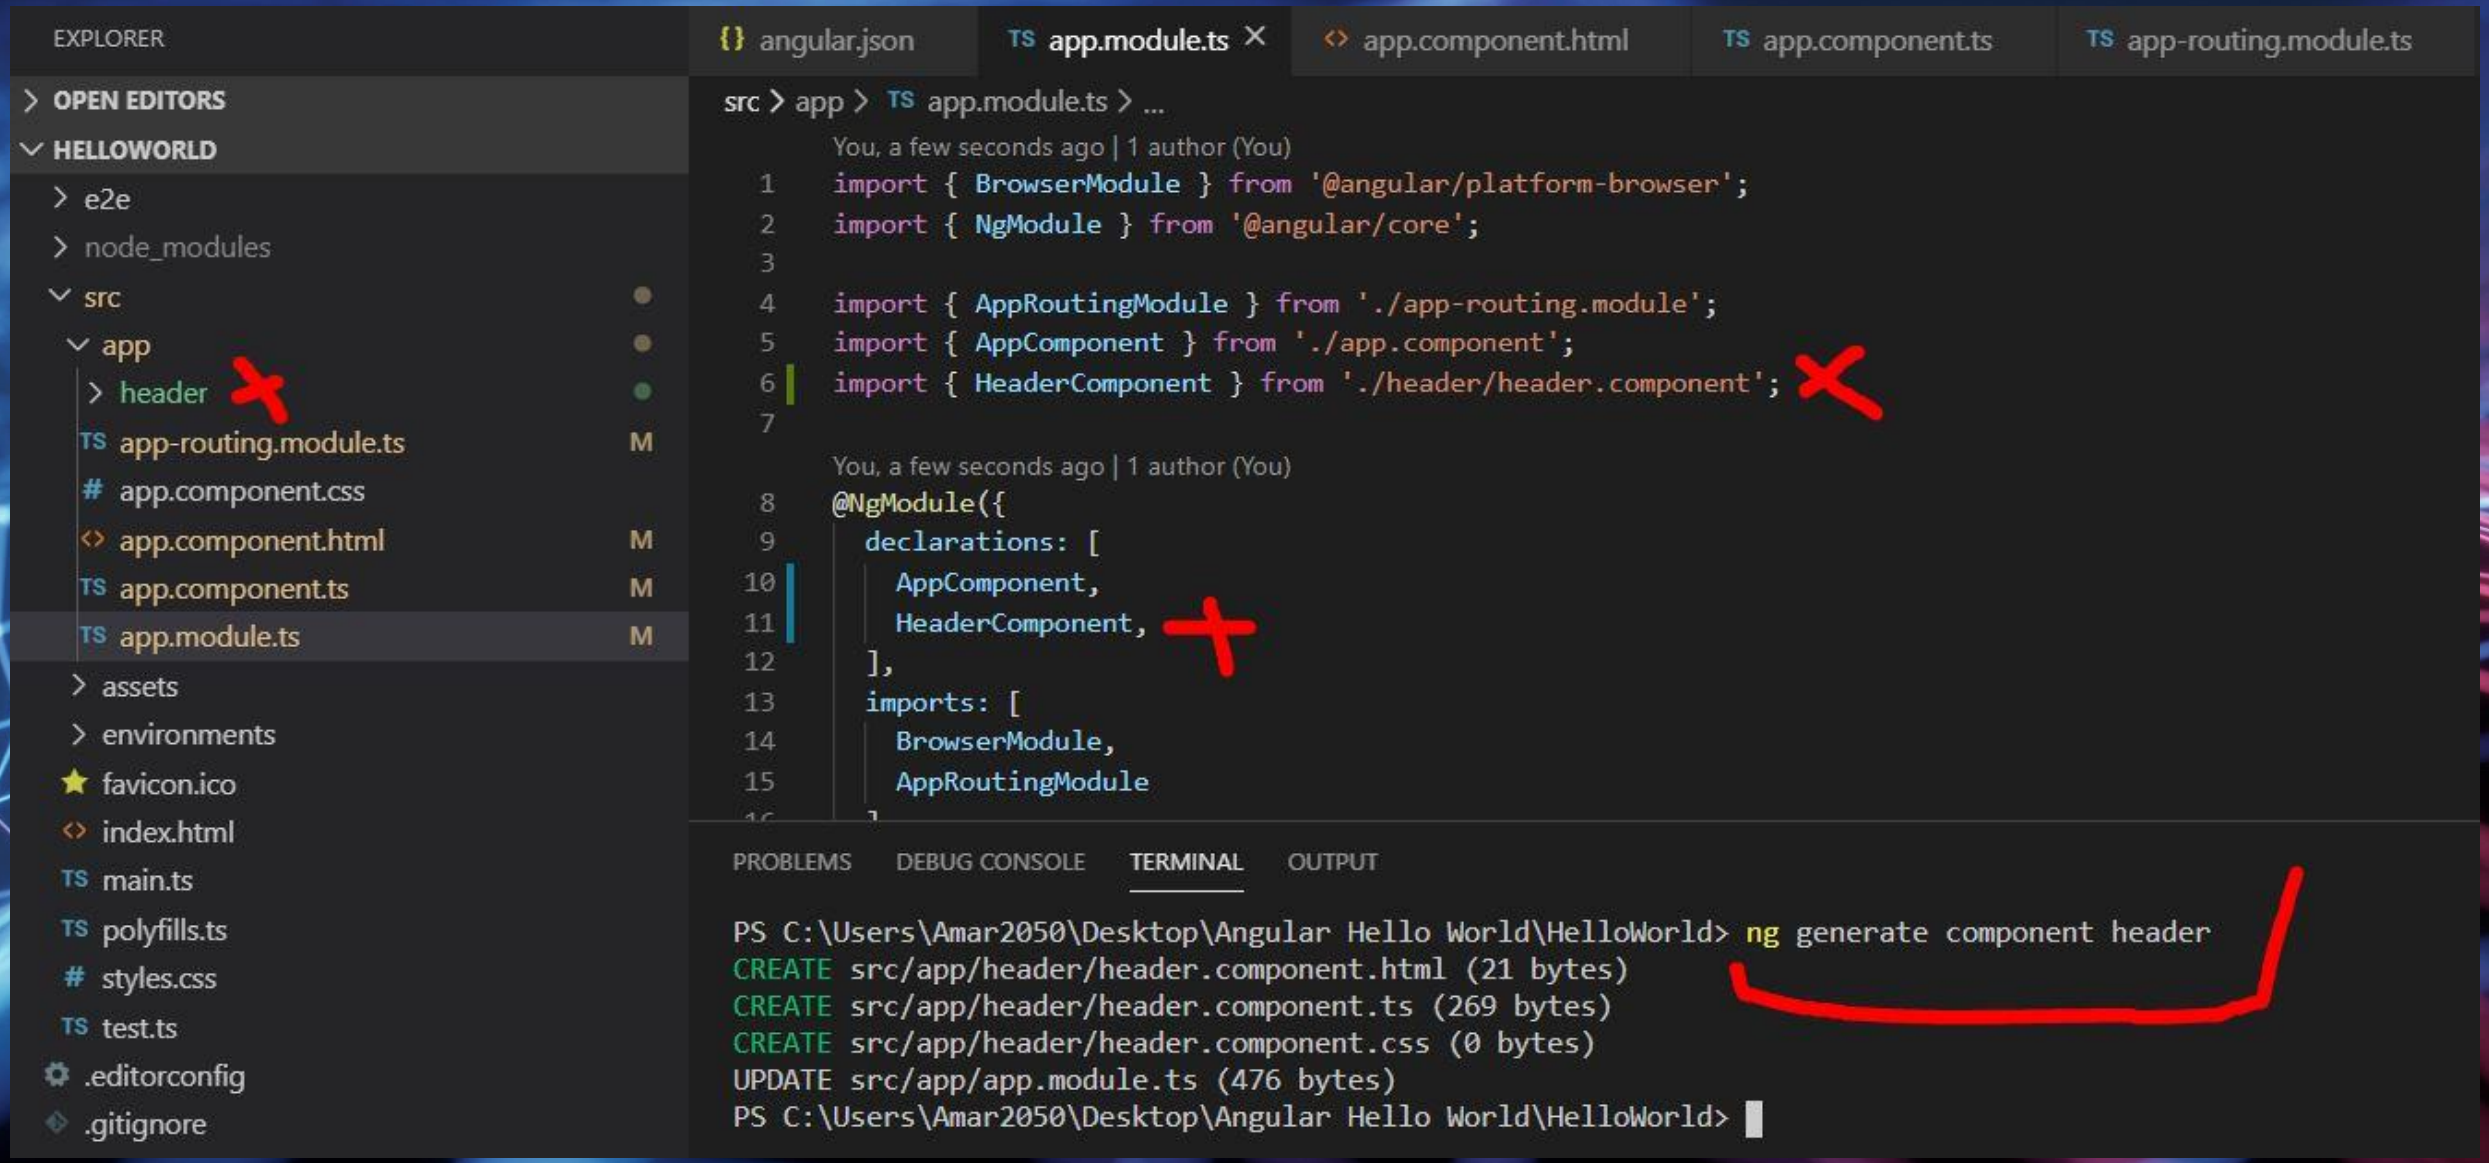
You, a minute ago | 1 author (You)

```ts
@NgModule({
  declarations: [
    AppComponent,
  ],
  imports: [
    BrowserModule,
    AppRoutingModule
  ],
  providers: [],
  bootstrap: [AppComponent]
})
export class AppModule { }

```

Créer un component

ng generate component header



Life Cycle

src > app > header > header.component.ts > ...

```ts
import { Component, OnInit } from '@angular/core';

@Component({
  selector: 'app-header',
  templateUrl: './header.component.html',
  styleUrls: ['./header.component.css']
})
export class HeaderComponent implements OnInit {

  constructor() { }

  ngOnInit() {
  }

}
```

Life Cycle

Drive-X
Voitures
Pilotes
Drive-X

Créer carsList et driversList component

```
PS C:\Users\Amar2050\Desktop\Angular Hello World\HelloWorld> ng generate component carsList
CREATE src/app/cars-list/cars-list.component.html (24 bytes)
CREATE src/app/cars-list/cars-list.component.ts (280 bytes)
CREATE src/app/cars-list/cars-list.component.css (0 bytes)
UPDATE src/app/app.module.ts (568 bytes)
PS C:\Users\Amar2050\Desktop\Angular Hello World\HelloWorld> ng generate component driversList
CREATE src/app/drivers-list/drivers-list.component.html (27 bytes)
CREATE src/app/drivers-list/drivers-list.component.ts (292 bytes)
CREATE src/app/drivers-list/drivers-list.component.css (0 bytes)
UPDATE src/app/app.module.ts (672 bytes)
PS C:\Users\Amar2050\Desktop\Angular Hello World\HelloWorld>
```

ng generate component carsList

ng generate component driversList

ponent.html

cars-list.component.html

src > app > cars-list > cars-list.component.html > ...

```
1   <h1 class="my-5">
2       Nos Vehicules
3   </h1>
4
```

drivers-list.component.html

src > app > drivers-list > drivers-list

```
1   <h1 class="my-5">
2       Nos Pilotes
3   </h1>
```

QUIZ 1/5

npm –v et node –v

C’est pour installer la version lts	• A
Vérifier la présence de node et npm et la version installé	• B
ça démarre un projet node ou npm avec la dernière version	• C
Ça configure notre machine pour npm et node	• D

QUIZ 1/5

npm –v et node –v

C’est pour installer la version lts	• A
Vérifier la présence de node et npm et la version installé	• B
ça démarre un projet node ou npm avec la dernière version	• C
Ça configure notre machine pour npm et node	• D

QUIZ 2/5

Après avoir installer la CLI de Angular

On peut utiliser le terme ng si notre machine nous permet l'utilisation de script	• A
Il faut télécharger Angular sur le site officiel	• B
On peut faire un ng create new MonProjet	• C
On peut faire un ng new MonProjet et rajouter des flags pour skiper des choses…	• D

QUIZ 2/5

Après avoir installer la CLI de Angular

On peut utiliser le terme ng si notre machine nous permet l'utilisation de script	• A
Il faut télécharger Angular sur le site officiel	• B
On peut faire un ng create new MonProjet	• C
On peut faire un ng new MonProjet et rajouter des flags pour skiper des choses...	• D

QUIZ 3/5

Un projet Angular c'est

Un ensemble de fichiers JS et HTML	• A
C'est bien !	• B
Un peu de toutes extensions mais on bosse dans le dossier SRC principalement	• C
Un framework de Google et un langage de programmation de Microsoft	• D

QUIZ 3/5

Un projet Angular c'est

Un ensemble de fichiers JS et HTML	• A
C'est bien !	• B
Un peu de toutes extensions mais on bosse dans le dossier SRC principalement	• C
Un framework de Google et un langage de programmation de Microsoft	• D

QUIZ 4/5

App-component

C’est un component de base	• A
Il faut le créer avec un ng generate component	• B
Je ne l’ai pas !	• C
C’est le component qui va accueillir les autres	• D

QUIZ 4/5

App-component

C’est un component de base	• A
Il faut le créer avec un ng generate component	• B
Je ne l’ai pas !	• C
C’est le component qui va accueillir les autres	• D

QUIZ 5/5

Un component c'est

- C'est 3 fichiers minimum • A
- C'est 1 fichier • B
- C'est une brique indépendante • C
- C'est des modules de services • D

QUIZ 5/5

Un component c'est

- C'est 3 fichiers minimum • A
- C'est 1 fichier • B
- C'est une brique indépendante • C
- C'est des modules de services • D
